JOHN L. DAY

Newark Official Police Photographer

Went to the saplings. Photographed and developed photographs of manure piles, manure, etc., but does not know where any positives or negatives are. Never delivered them to anyone because they were never asked for. Thinks plates were thrown away in ordinary course. Manure might have been horse manure.

JOHN L. DAY

August 18, 1926

Newark Official Police Photographer

TESTIFIED (Page 665 et seq.):

Went to saplings, photographed mule prints, manure, etc. (665).

Developed photographs but does not know where they are (665).

Never delivered them because they were never asked for and does not know where they are now (665).

Saw the tracks, the manure and the condition of the sapling and directed the photographer (666).

CROSS EXAMINATION:

Manure might have been horse manure (666-7).

Thinks he had the negatives in 1923 as well as 1922 (667).

Does not know about 1924. Does not know what happened to his plates (667).

(There is no page 668 in record due to misnumbering)

All his plates were developed. He thinks positives were made from all of them (669).

No positives or negatives in the files of his office, none found at home. Will look again (670-5).
